Teka, integrated functionality

Teka has two lines of products to meet the workspaces needs to have functional closets and containers: Teka equipped partition and Teka partition equipment.

The absence of a plinth and the clean lines are devices that combine functionality and harmony of shapes.

Both lines have modules with a interaxis 500 or 1000 mm and a maximum height of 3500 mm. The structure is made up of melamine-faced chipboard sides and 22 mm thick horizontal structural shelves.

The depth of Teka equipped partition is 462 mm in the Wide version and 376 mm in the Slim version. The depth of Teka partition equipment is 444 mm in the Wide version and 358 mm in the Slim version.

Lower and upper pressers allow for partition leveling and height compensation of + or -20 mm.

The partitions have compartments that can be inspected for the passage of systems. The internal-structural shelves of the closets are in 22 mm thick melamine-faced chipboard in silver gray color. Their maximum capacity is 30 Kg.

On 18 mm thick doors it is possible to install 2 or 3 90 degree hinges with a knob or an opening handle. A "dust cover" profile is inserted between the two doors of the closet.

The mobile shelves are metallic and silver gray, with a maximum capacity of 50 kg.

Doors, backs, sides and tops are in melamine chipboard and the finish is chosen from the Mangini color range, the interior is gray.
