Noi, *We, Nous*

Il nostro gruppo opera nel settore terziario con la divisione Mangini Workspace, nel settore sanitario con la divisione Mangini Healthcare, nel settore farmaceutico con la divisione Mangini Cleanroom e, con la divisione Acotec, offre soluzioni turnkey in tutti gli ambiti di intervento della Mangini Group. Mangini Workspace realizza pareti mobili, meeting room, phone booth e complementi di arredo per uffici direzionali e operativi.

Mangini Healthcare progetta, produce e installa pareti e controsoffitti per sale operatorie, terapie intensive, unità coronariche, degenze specializzate sino ad arrivare alla realizzazione di modular hospital.

Mangini Cleanroom realizza pareti e controsoffitti per tutti gli ambiti dove sono necessari ambienti a contaminazione controllata.

Acotec Turnkey Division da oltre 35 anni, con il suo team di ingegneri specializzati, progetta e realizza, chiavi in mano, ambienti a contaminazione controllata e a contenimento biologico per i settori farmaceutico, sanitario, microelettronico e aerospaziale. Le sue competenze nel turnkey le abbiamo estese a tutti gli ambiti di intervento della Mangini Group.

[EN] Our group operates in the tertiary sector with the Mangini Workspace division, in the healthcare sector with the Mangini Healthcare division, in the pharmaceutical sector with the Mangini Cleanroom division and, with the Acotec division, offers turnkey solutions in all areas of intervention of the Mangini Group. Mangini Workspace creates mobile partitions, meeting rooms, phone booths and furnishing accessories for executive and operational offices. Mangini Healthcare designs, manufactures and installs partitions and false ceilings for operating theaters, intensive care units, coronary units, specialized wards, up to the creation of a modular hospital.

Mangini Cleanroom manufactures partitions and false ceilings for all areas where controlled contamination environments are required. Acotec Turnkey Division for over 30 years, with its team of specialized engineers, has been designing and manufacturing, turnkey, biological containment environments for the pharmaceutical, healthcare, microelectronics and aerospace sectors. We have extended its skills in the turnkey to all areas of intervention of the Mangini Group.

[FR] Notre groupe intervient dans le secteur tertiaire avec la division Mangini Workspace, dans le secteur de la santé avec la division Mangini Healthcare, dans le secteur pharmaceutique avec la division Mangini Cleanroom et, avec la division Acotec, propose des solutions clés en main dans tous les domaines d'intervention de la société Mangini Groupe. Mangini Workspace crée des cloisons amovibles, des salles de réunion, des cabines téléphoniques et des accessoires d'ameublement pour les bureaux de direction et opérationnels. Mangini Healthcare a conçu, fabriqué et installé des cloisons et des faux plafonds pour les blocs opératoires, les unités de soins intensifs, les unités coronariennes, les services spécialisés, jusqu'à la création d'un hôpital modulaire. Mangini Cleanroom fabrique des cloisons et des faux plafonds pour toutes les zones où des environnements à contamination contrôlée sont requis. Acotec Division clé en main depuis plus de 30 ans, avec son équipe d'ingénieurs spécialisés, conçoit et fabrique, clé en main, des environnements de confinement biologique pour les secteurs pharmaceutique, de la santé, de la microélectronique et de l'aérospatiale. Nous avons étendu ses compétences dans le clé en main à tous les domaines d'intervention du Groupe Mangini.

Flux One

Flux One è il sistema di pareti mobili divisorie a doppia vetrata continua con profilo guida universale che consente l'inserimento di pannelli ciechi.

[EN]

Flux One is the system of dividing mobile partitions with continuous double glazing with a universal rail profile that allows the insertion of solid panels.

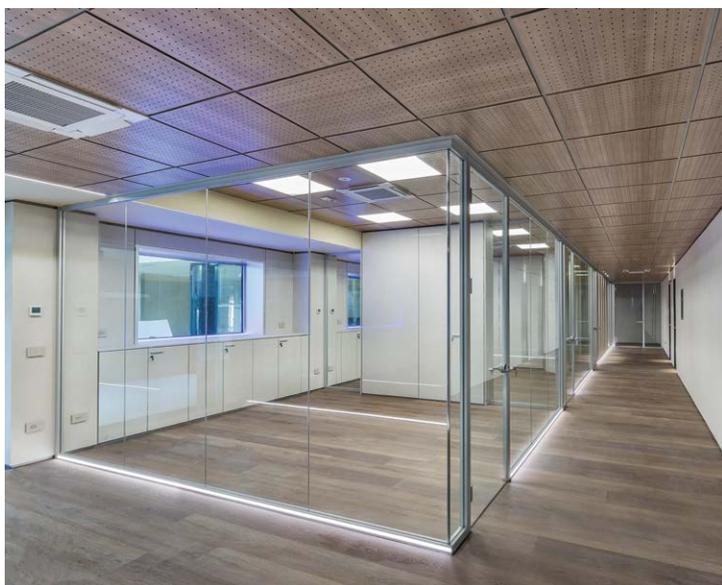

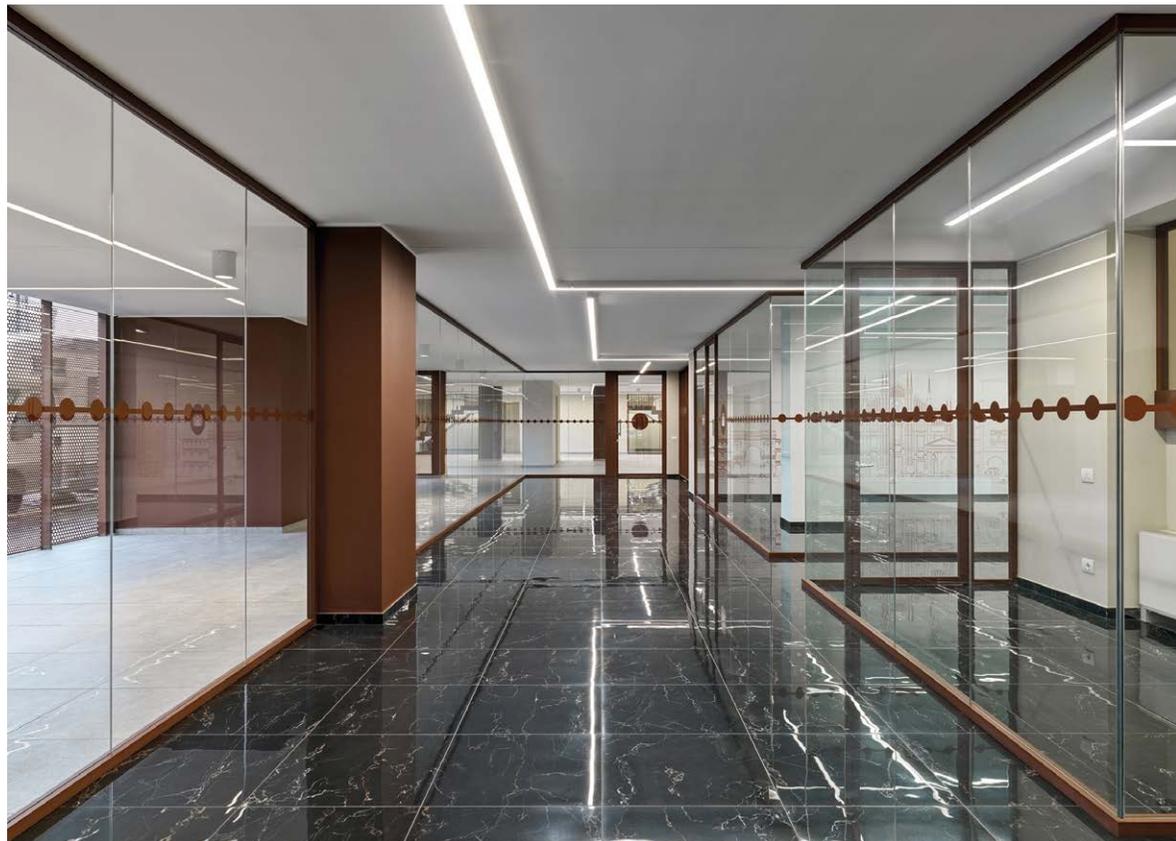

[FR]

Flux One est le système de séparation des cloisons amovibles à double vitrage continu avec un profil de lisse universel qui permet l'insertion de panneaux pleins.

Flux Mono

Flux Mono è la parete mobile a vetro singolo e cieca realizzata con profilo in alluminio anodizzato o verniciato.

[EN]

Flux Mono is the single glass and solid mobile partition made with anodized or varnished aluminum profile.

[FR]

Flux Mono est la cloison amovible monobloc vitrée et pleine réalisée en profilé aluminium anodisé ou verni.

Planika

Planika è la linea di pareti mobili con sistema di fissaggio a scomparsa ad alto contenuto tecnologico, realizzata con differenti finiture e materiali al fine di rispondere a tutte le diverse necessità di progetto.

[EN]

Planika is the line of mobile partitions with a concealed fixing system with a high technological content, made with different finishes and materials in order to meet all the different project needs.

[FR]

Planika est la ligne de cloisons amovibles avec système de fixation invisible à haut contenu technologique, réalisée avec différentes finitions et matériaux afin de répondre à toutes les différentes exigences du projet.

Teka

Teka ha due linee di prodotti per assolvere alle necessità nei workspace di avere armadiature e contenitori funzionali: pareti divisorie attrezzate e attrezzamento di parete.

[EN]

Teka has two product lines to meet the needs in workspaces to have functional wardrobes and containers: equipped partition and partition equipment.

[FR]

Teka propose deux gammes de produits pour répondre aux besoins des espaces de travail d'avoir des armoires et des contenants fonctionnels: cloison équipée et équipement de cloison.

Planika Health

Planika Health è il nostro sistema di pareti mobili Healthcare progettato per le sale operatorie, spazi sanitari e ospedalieri con struttura modulare e flessibile, integrata con gli impianti meccanici ed elettrici, che consente il mantenimento di un'elevata efficienza in termini di riduzione dei rischi di contaminazione.

[EN]

Planika Health is our Healthcare mobile partition system designed for operating theaters and healthcare and hospital spaces with a modular and flexible structure, integrated with mechanical and electrical systems, which allows the maintenance of high efficiency in terms of reducing the risk of contamination.

[FR]

Planika Health est notre système de cloisons amovibles conçu pour les salles d'opération et les espaces de soins de santé et hospitaliers avec une structure modulaire et flexible, intégrée aux systèmes mécaniques et électriques, qui permet de maintenir une efficacité élevée en termes de réduction du risque de contamination.

Kybos

Kybos è la linea di pareti mobili realizzata per cleanroom e laboratori con struttura in alluminio e pannelli sandwich modulari autoportanti a scomparsa e controsoffitti per ambienti a contaminazione controllata. I pannelli, aventi spessore 45 e 62 mm, rispondono a elevati standard di tenuta, di coplanarità, di resistenza meccanica agli urti, di resistenza agli agenti chimici e di reazione al fuoco con bassa emissione di fumi.

[EN]

Kybos is the line of mobile partitions made for cleanroom and laboratories with an aluminum structure and modular self-supporting retractable sandwich panels and false ceilings for controlled contamination environments. The panels, having a thickness of 45 and 62 mm, meet high standards of tightness, coplanarity, mechanical resistance to impacts, resistance to chemical agents and reaction to fire, with low smoke emission.

[FR]

Kybos est la ligne de cloisons amovibles conçues pour les salles blanches et les laboratoires avec une structure en aluminium et des panneaux sandwich rétractables autoportants modulaires et des faux plafonds pour les environnements à contamination contrôlée. Les panneaux, d'une épaisseur de 45 et 62 mm, répondent à des normes élevées d'étanchéité, de coplanarité, de résistance mécanique aux chocs, de résistance aux agents chimiques et de réaction au feu, avec une faible émission de fumée.

Kybos Easy

Kybos Easy è la linea di pareti mobili per ambienti a contaminazione controllata con struttura in acciaio zincato e pannelli sandwich modulari autoportanti a scomparsa. I pannelli hanno spessore 45 e 62 mm. L'utilizzo di profili pressopiegati consente di personalizzare le misure e di adeguarle alle esigenze del cliente.

[EN]

Kybos Easy is the line of mobile partitions for controlled contamination environments with galvanized steel structure and modular self-supporting retractable sandwich panels. The panels have a thickness of 45 and 62 mm. The use of bent profiles allows you to customize the measures and adapt them to the customer's needs.

[FR]

Kybos Easy est la ligne de cloisons amovibles pour environnements à contamination contrôlée avec structure en acier galvanisé et panneaux sandwich rétractables autoportants modulaires. Les panneaux ont une épaisseur de 45 et 62 mm. L'utilisation de profils pliés vous permet de personnaliser les mesures et de les adapter aux besoins du client.
